Next review due by: February 2025

The Principles of our school Asthma Policy

- The School recognises that asthma is an important condition affecting many school children and welcomes all pupils with asthma
- Ensures that children with asthma participate fully in all aspects of school life including PE
- Recognises that immediate access to reliever inhalers is vital
- Keeps records of children with asthma and the medication they take
- Ensures the school environment is favourable to children with asthma
- Ensures that other children understand asthma
- Ensures all staff who come into contact with children with asthma know what to do in the event of an asthma attack
- Will work in partnership with all interested parties including all school staff, parents, governors, doctors and nurses, and children to ensure the policy is implemented and maintained successfully

This policy has been written with advice from the Department for Education and Employment, National Asthma Campaign, the local education authority, the school health service, parents, the governing body and pupils

1. This school recognises that asthma is an important condition affecting many school children and positively welcomes all pupils with asthma.
2. This school encourages children with asthma to achieve their potential in all aspects of school life by having a clear policy that is understood by school staff, their employers (the local education authority) and pupils. Supply teachers and new staff are ALSO MADE AWARE OF THE POLICY. All teachers, and at least one member of staff in each class is provided with asthma training on a regular basis. We keep a list of school staff trained in this area. This training is provided by Education for Health and is a free 45 minute online training course which lasts for 2 years.

Medication

Immediate access to a reliever inhaler is vital. Children are encouraged to carry their inhaler as soon as their parents, carer, doctor, nurse or class teacher agree they are mature enough to manage their own medication. Children should always tell their class teacher or first aider when they have had occasion to use their inhaler. Records are kept each time an inhaler is used when it is not normally used. The reliever inhalers for younger children are kept in their individual classroom in a designated first aid area in a cupboard marked with a green and white first aid sign.

All inhalers must be labelled with the child's name by the parent. School staff are not required to administer medication to children except in an emergency however many of our staff are happy to do this. School staff who agree to do this are insured by the local education authority when acting in accordance with this policy. All school staff will let children take their own medication when needed.

Record Keeping

At the beginning of each school year, or when a child joins the school, parents are asked to inform the school if their child is asthmatic. All parents of children with asthma are required to complete a School Asthma Card (Asthma UK) (Appendix 1) and return it to the school. From this information the school keeps its asthma register which is kept in the School Office. If any changes are made to a child's medication it is the responsibility of the parents or carer to inform the school.

Bucklesham Primary School **does not** hold an emergency inhaler and spacer as per 'Guidance on the use of Emergency Salbutamol inhalers in schools' March 2015. This medication can only be administered to children on the Asthma Register. Staff have been trained to administer the emergency inhaler and there are pictorial and written instructions around the school.

Asthma inhalers for each child are regularly checked for expiry dates by a named member of staff (Emma Nicholls). Each child's inhaler is kept in their own classroom in a named wallet containing their individual medication and asthma card, in their class designated first aid area.

All staff members are responsible for acquainting themselves with the triggers of a possible attack (allergies, colds, cough, cold weather) for each individual child in their care. All this information is found in their medication wallet along with their medication.

PE

Taking part in sports is an essential part of school life. Teachers are aware of which children have asthma from the asthma register. Children with asthma are encouraged to participate fully in PE. Teachers will remind children whose asthma is triggered by exercise to take their reliever inhaler before the lesson. Each child's inhalers will be labelled and kept in a box at the site of the lesson, if necessary but most children's inhalers will be kept in the classroom unless we go off site. If a child needs to use their inhaler during the lesson, they will be encouraged to do so. Records are kept every time a child uses their inhaler. A member of staff signs the medical administration form in each class.

School Trips and Outside Activities

When a child is away from the school classroom on a school trip, club, outside sport or PE, their inhaler should accompany them and be made available to them at all times.

The School Environment

The school does all that it can to ensure the school environment is favourable to children with asthma. The school does not keep furry and feathery pets and has a non-smoking policy. As far as possible the school does not use chemicals in science or art lessons that are potential triggers for children with asthma. Children are encouraged to leave the room and go and sit in the breakout area if any particular fumes trigger their asthma.

Making the School Asthma Friendly

The school ensures that all children understand asthma. Asthma can be included in Key Stages 1 and 2 in science, design and technology, geography, history and PE of the national curriculum. Children with asthma and their friends are encouraged to learn about asthma; information for children and teens can be accessed from the following website www.asthma.org.uk.

When a Child is falling behind in lessons

If a child is missing a lot of time from school because of asthma or is tired in class because of disturbed sleep and falling behind in class, the class teacher will initially talk to the parents. If appropriate the teacher will then talk to the school nursing team and special educational needs coordinator about the situation. The school recognises that it is possible for children with asthma to have special education needs because of asthma.

Asthma Attacks

All staff who come into contact with children with asthma know what to do in the event of an asthma attack. The school follows the following procedure, which is clearly displayed in all classrooms.

- 1. Ensure that the reliever inhaler is taken immediately.**
- 2. Stay calm and reassure the child.**
- 3. Help the child to breathe by ensuring tight clothing is loosened and is seated in an upright position.**

After the attack

Minor attacks should not interrupt a child's involvement in school. When they feel better, they can return to school activities.

The child's parents must be informed about the attack.

Emergency procedure

If the pupil does not feel better or you are worried at any time before reaching 10 puffs from the inhaler, call 999 for an ambulance. If the ambulance has not arrived after 10 minutes, give an additional 10 puffs as detailed above. In the event of an ambulance being called, the pupil's parents or carers should always be contacted. In the event of a pupil being taken to hospital by ambulance, they should always be accompanied by a member of staff until a parent or carer is present.

Appendix 1: School Asthma Card

School Asthma Card

To be filled in by the parent/carer

Child's name

Date of birth

Address

Parent / carer's name

Telephone - home

Telephone - mobile

Email

Doctor/nurse's name

Doctor/nurse's telephone

This card is for your child's school. **Review the card at least once a year and remember to update or exchange it for a new one if your child's treatment changes during the year.** Medicines and spacers should be clearly labelled with your child's name and kept in agreement with the school's policy.

Reliever treatment when needed

For shortness of breath, sudden tightness in the chest, wheeze or cough, help or allow my child to take the medicines below. After treatment and as soon as they feel better they can return to normal activity.

Medicine	Parent/carer's signature
<input type="text"/>	<input type="text"/>

If the school holds a central reliever inhaler and spacer for use in emergencies, I give permission for my child to use this.

Parent/carer's signature Date

Expiry dates of medicines

Medicine	Expiry	Date checked	Parent/carer's signature

What signs can indicate that your child is having an asthma attack?

Does your child tell you when they need medicine?

Yes No

Does your child need help taking their asthma medicines?

Yes No

What are your child's triggers (things that make their asthma worse)?

Pollen Stress
 Exercise Weather
 Cold/flu Air pollution

If other please list

Does your child need to take any other asthma medicines while in the school's care?

Yes No

If yes please describe

Medicine	How much and when taken
<input type="text"/>	<input type="text"/>

Dates card checked

Date	Name	Job title	Signature / Stamp
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

To be completed by the GP practice

Actions to take if a child is having an asthma attack

1. Help them to sit up – don't let them lie down. Try to keep them calm.
2. Help them take one puff of their reliever inhaler (with their spacer, if they have it) every 30 to 60 seconds, up to a total of 10 puffs.
3. If they don't have their reliever inhaler, or it's not helping, or if you are worried at any time, **call 999 for an ambulance.**
4. If the ambulance has not arrived after 10 minutes and their symptoms are not improving, repeat step 2.
5. If their symptoms are no better after repeating step 2, and the ambulance has still not arrived, **contact 999 again immediately.**
